ABSTRACT

The School-Based Management and Accountability Program, also known as the "ABCs of Public Education," or just "the ABCs," is the statewide school-based accountability program for public schools in North Carolina. This document reports the results of the 1997-98 ABCs, in the second year of the implementation of the ABCs in elementary schools and the first year in the high schools. Part I of this report contains the results for K-8 schools, and Part II reports high school results. In each part, Section A presents the growth or gain and performance of the public schools, while sections B through G characterize schools by state-designated categories of performance from excellence to low performance. Charter schools, which are included with other schools, are also listed in Section H for easy identification. Appendixes explain program adjustments for 1997-98's accountability models, technical notes, and a list of schools excluded from this report. A glossary defines terms used in the report. (Contains 15 tables.) (SLD)

**A Report Card for the ABCs of Public Education, Volume I
Growth and Performance of North Carolina Schools, 1997-98**

Foreword

A Report Card for the ABCs of Public Education Volume I, Growth and Performance of North Carolina Schools 1997-98 is published in accordance with the School-Based Management and Accountability Act (1996) of the North Carolina General Assembly. The School-Based Management and Accountability Program, also known as the ABCs of Public Education (or just the ABCs) is the statewide school-based accountability program for public schools in North Carolina. This document reports the results of the 1997-98 ABCs, which is the second year's implementation of the ABCs in the state's K-8 schools, and the first year of implementation of the ABCs in the state's high schools.

The 1996-97 results of the ABCs of Public Education in K-8 schools were presented to the State Board of Education in a report in August 1997. In November 1997 these same data were incorporated and published in the State Report Card. This year, the August ABCs report to the State Board of Education is published as A Report Card for the ABCs of Public Education, Volume I. Volume II, containing subgroup statistics and supplemental data, will be published later in the fall of 1998.

The Report Card for the ABCs of Public Education, Volume I is divided into two parts, with Part I reporting the results for K-8 schools, and Part II reporting the results for High Schools. (Schools with grades in both the K-8 and 9-12 grade ranges appear in both Part I and Part II.) In Parts I and II, Section A presents the growth or gain and performance of North Carolina's public schools. Sections B through G categorize schools by Schools of Excellence, Schools of Distinction, Top 25/10, Exemplary Growth/Gain, Expected Growth/Gain, and Low-Performing schools. Charter Schools are included among the other public schools listed in these categories, and they also are listed in a separate section H for easy reference. Appendix A to Volume I explains program adjustments and options related to this year's accountability models, and Appendix B includes technical notes describing how statistical computations were implemented. Appendix C contains a listing of North Carolina public schools excluded from this report. A Glossary is provided at the end of Volume I that defines terms used in this publication.

A Report Card for the ABCs of Public Education, Volume I Growth and Performance of North Carolina Schools, 1997-98

Executive Summary

Background

The State Board of Education developed the ABCs of Public Education in response to the School-Based Management and Accountability Program (SB 1139) enacted by the General Assembly in June 1996. The ABCs focuses on strong accountability with an emphasis on high educational standards; teaching the basics; and maximum local control. An accountability model for elementary and middle schools was implemented in 1996-97. The high school accountability model was developed during 1996-97, and was implemented for the first time in 1997-98. This report gives the results of the 1997-98 implementation of the ABCs in all public schools of North Carolina.

The ABCs Accountability Model for K-8 establishes growth standards for each elementary and middle school in the state. Schools that attain specified levels of growth are eligible for incentive awards or other recognition (including Schools of Excellence, Schools of Distinction or Top 25 Schools in Academic Growth). Schools where growth and performance fall below specified levels are designated as low-performing. Outcomes are based on data collected during the 1997-98 school year and one previous year (for reading and mathematics) or two previous years (for writing in grades 4 and 7). To be eligible for incentive awards, schools also must not have excessive exemptions and must test at least 98% of their eligible students.

The ABCs High School Accountability Model establishes standards for improvement in each high school in the state. Schools that improve are eligible for incentive awards or other recognition (including Schools of Excellence, Schools of Distinction or Top 10 High Schools in North Carolina). Those who fail to improve and whose performance in the current year falls below a specified level are designated as low-performing. Outcomes are based on data collected during the 1997-98 school year and two previous years. To be eligible for incentive awards, schools must not have excessive exemptions and must test at least 95% of students enrolled in specific courses for which End-of-Course tests are given.

Schools that serve students in grades K-8 and grades 9-12 are subject to both the Accountability Model for K-8 and the High School Accountability model. For 1997-98 only, such schools could choose to be treated separately under each model or to be evaluated with a comprehensive model that combines the

standards from both models into a single analysis. In 1998-99, the comprehensive approach will be used for all schools.

Participating schools

In 1997-98, every school that contained one or more of the grades 3-12 and that collected the appropriate data participated in the ABCs. Appropriate data for elementary schools included testing results in reading, mathematics, and writing. Appropriate data for high schools included End of Course (EOC) testing results in Algebra I; English I; Biology; U.S. History; Economic, Legal and Political Systems (ELPS); English II (Writing); and numbers of students completing College Prep/College Tech Prep courses of study. K-2 schools sending more than half of their students to a single receiving school were eligible for incentive awards if the receiving school earned an incentive award based on meeting its growth standard. Alternative schools and special schools without sufficient data were eligible for prorated incentive awards if one or more of the schools they served earned incentive awards.

Analyses

The status of schools was determined based on the values of composite scores computed for expected growth/gain, exemplary growth/gain, and percentage of students at or above grade level. The term "growth composites" is used with K-8 schools; the term "gain composite" is used with high schools.

The expected growth composite is based on three factors: statewide average growth, the previous performance of students in the school, and a statistical adjustment which is needed whenever test scores of students are compared from one year to the next. The exemplary growth composite factors in an additional ten percent above the statewide average growth. Growth composites are based on two years of data for reading and mathematics and three years of data for writing. The performance composite (the percentage of students scoring at or above grade level) is based on reading, mathematics, and writing data available for the current year. Consequently, the 1997-98 scores for all students in reading, mathematics and writing are used in the performance composite.

For high schools, the expected gain composite is based on making improvement over the performance of students at the school in previous years. The exemplary gain composite requires that a school improve by a specific amount over and above expected. Gain composites are based on three years of data for EOC and English II tests and two years of data on College Prep and College Tech Prep completion. The high school performance composite (the percentage of students scoring at or above Level III) is based on the Algebra I, Biology,

ELPS, English I and II, and U.S. History test data available for the current year, with one exception. The Algebra I scores of ninth graders who took Algebra I prior to ninth grade are included in the high school's performance composite.

Schools with grade ranges which spanned the K-8 and high school models could choose to be evaluated as two separate schools for this accountability year. Otherwise, they were evaluated as comprehensive schools, with the K-8 grades combined with the high school grades. These schools are denoted by footnotes and appear in Part I and Part II of this report.

The ABCs results published here were produced on a Compaq Computer, Model DP600MMX 4300/CDS, Pentium(r) with 128 Mb RAM running under Windows 95 Version 4.00.950a. Additional detail and technical information about ABCs analyses are provided in the Appendices.

Definition of Awards and Recognition Categories

Schools have been classified into several categories for the purpose of incentive awards and recognition. The award or recognition a school receives is determined in most cases by the school's attainment as reflected in the growth or gain composites (expected and exemplary) and the performance composite. (Exceptions are explained in the Appendix.) The categories are defined as follows.

Schools of Excellence

A School of Excellence is a school that meets its expected growth (K-8) or expected gain (high school) standard and has at least 90 percent of its students performing at or above grade level for K-8 schools, or at or above Achievement Level III for high schools. Such schools will be recognized at a statewide luncheon sponsored by the State Board of Education and the Department of Public Instruction in October, 1998. They will receive a dated banner to hang in the school and a certificate. In addition, they will receive whatever financial award they earn as having met expected or exemplary status.

Schools of Distinction

A School of Distinction is a school that has at least 80 percent of its students performing at or above grade level (for K-8 schools), or at or above Achievement Level III (for high schools) irrespective of growth or gain (but does not qualify as a School of Excellence). Distinguished schools will receive a plaque and a certificate.

Top 25 Schools in Academic Growth and Top 10 High Schools

The Top 25 are K-8 schools that have attained the State's 25 highest values on the exemplary growth composite. The Top 10 are high schools that have attained the State's 10 highest values on the exemplary gain composite. These schools will be recognized at the statewide luncheon in October 1998. In addition, they will receive a dated banner to hang in the school, a certificate and school incentive awards.

Exemplary Schools

Exemplary Schools are those that attain their exemplary growth (K-8) or exemplary gain (high schools) standard. They will receive a certificate and school incentive awards.

Schools that Meet Expected Growth Standards

Schools that attain their expected growth (K-8) or expected gain (high schools) standard [but not their exemplary growth (K-8) or exemplary gain (high schools) standard] will receive a certificate of recognition and school incentive awards.

Schools Having Adequate Performance

These schools do not meet their expected growth or expected gain standards; but they have at least half their students scoring at or above grade level (K-8), or at or above Achievement Level III (high schools), as measured by the performance composite.

Low-Performing Schools

Low-Performing Schools are those that fail to meet their expected growth or expected gain standard **and** have significantly less than 50% of their students performing at or above grade level (K-8), or at or above Achievement Level III (high schools).

In addition to the growth and performance standards, there are testing requirements that all schools must meet. K-8 schools must test at least 98% of their eligible students. (Students who are individually exempted from testing in accordance with guidelines for North Carolina testing programs are not considered "eligible.") High schools must test at least 95% of all students enrolled in courses for which EOC tests are given. Also, schools must not have excessive exemptions.

In this report, schools that violate testing requirements are assigned a violation status and cannot receive another ABCs status, except low-performing. The low-performing schools that violate testing requirements are assigned the low-performing status in addition to the violation status.

Schools that violate any of the testing requirements are not eligible for incentive awards. In addition, schools that violate testing requirements for two years may be designated as low-performing by the State Board of Education.

Presentation of Results

The results are presented in A Report Card for the ABCs of Public Education, Volume I, in two parts. Part I presents the results for K-8 schools, and Part II presents the results for high schools. Each of these parts is subdivided into sections A through H (K-8), and sections A through G (high schools). These sections present the following categories of ABCs results: (A) a listing of school growth (Part I) or gain (Part II) and performance, by LEA; (B) a listing of schools, identified as Schools of Excellence, by LEA; (C) a listing of schools identified as Schools of Distinction, by LEA; (D) a listing of the Top 25 K-8 Schools in Academic Growth (Part I) and a listing of the Top 10 High Schools (Part II); (E) a listing of schools, identified as making exemplary growth (Part I) or exemplary gain (Part II), by LEA; (F) a listing of schools, identified as making only expected growth (Part I) or expected gain (Part II), by LEA; (G) a listing of schools identified as low performing, by LEA – also sorted by the expected growth (Part I) or gain (Part II) composite, and by the performance composite; and, (H) a listing of K-8 Charter schools.

In Part I, Section A, *Growth and Performance of K-8 Schools in North Carolina 1997-98*, writing data for grade 4 and grade 7 are provided under the appropriate column heading. If a K-8 school had data for only one of the two grades, a zero appears in the columns for which there were no data. If a school had no writing data for either of these two grades, a zero appears in both columns. A zero also appears if a school had writing data, but no students were at or above grade level in writing.

In Part II, Section A, *Gain and Performance of High Schools in North Carolina 1997-98*, data for expected and exemplary gain in Algebra I do not reflect students who took Algebra I prior to grade 9. However, these data are included in the computations for the high school performance composite, and are reflected in the *Composite* column.

Appendices to this volume contain information on programmatic and technical modifications that were applied to the 1997-98 ABCs models. Appendix A

includes notes on program adjustments and options and explains the footnotes denoting special cases in the report. Appendix B contains technical notes on the implementation of the K-8 and high school accountability models. Appendix C provides a listing of schools that were not included in this report for various reasons. Explanations of exclusions are given for each list.

A glossary is provided at the end of Volume I that explains terms used in this document.

Statistical Summary of Results

K-8 Schools

In 1997-98, there were 1,719 K-8 public schools that participated in the ABCs. These included traditional public schools, Charter Schools, alternative schools and special schools (e.g., hospital schools, ungraded schools and those serving students with disabilities). K-2 schools that fed more than 50% of their students into a single receiving school in 1997-98 were assigned ABCs status based on the status attained by the receiving school. Alternative/special schools that did not have sufficient data were assigned ABCs status on the basis of the *highest* performance of the schools they served. All other schools attained their status on the basis of the data they submitted.

ABCs Results for Elementary and Middle Schools

Award or Recognition Category	Number of Schools			
	K-8	Alt.	Total	%
Exemplary Schools	1075	57	1132	65.9
Schools Meeting Expected Growth (not Exemplary)	307	2	309	18.0
Schools Having Adequate Performance	262		262	15.2
Low-Performing Schools	15		15	0.9
Violated Testing Requirements	1		1	0.1
Total ABCs Schools	1660	59	1719	100.1

Percents do not total 100 due to rounding.

In addition, the following numbers of schools received special recognition. (These categories may overlap categories in the above table.)

Elementary and Middle Schools Receiving Other Recognition			
Category	Number of Schools	Percent of Schools	
Schools of Excellence	24		1.4
Schools of Distinction	290		16.9
Top 25 Schools in Academic Growth	26		1.5

Note: Two schools tied for 25th place among the Top 25.

Overall, 83.9 % of the elementary and middle schools met either expected or exemplary growth standards under the K-8 or comprehensive model.

High Schools

In 1997-98, there were 416 high schools that participated in the ABCs. These included traditional public schools, alternative schools and special schools (e.g., hospital schools, ungraded schools and those serving students with disabilities). Alternative/special schools that did not have sufficient data were assigned ABCs status on the basis of the *highest* performance of the schools they served. All other schools attained their status on the basis of the data they submitted.

ABCs Results for High Schools				
Award or Recognition Category	Number of Schools			
	9-12	Alt.	Total	%
Exemplary Schools	198	64	262	63.0
Schools Meeting Expected Gain (not Exemplary)	78	4	82	19.7
Schools Having Adequate Performance	51		51	12.3
Low-Performing Schools	15		15	3.6
Violated Testing Requirements	6		6	1.4
Total ABCs Schools	348	68	416	100.0

In addition, the following numbers of schools received special recognition. (These categories may overlap categories in the above table.)

High Schools Receiving Other Recognition		
Category	Number of Schools	Percent of Schools
Schools of Excellence	0	0.0
Schools of Distinction	1	0.2
Top 10 High Schools	10	2.4

Overall, 82.7 % of the high schools met either expected or exemplary gain standards under the high school model or the comprehensive model.

Results for elementary/middle schools and high schools should not be combined this year, because some schools are included in both summaries. For example, some schools were evaluated with separate accountability models for their K-8 grades and their high school grades under a provision of the State Board of Education for the 1997-98 year only. Such schools appear in both statistical summaries above, but their inclusion in a particular summary is based on only the applicable grades. Other schools were analyzed with the comprehensive model and these also appear in both summaries, but their ABCs status is based on all of their grades. Therefore some information is duplicated in the two statistical summaries. In 1998-99, all schools will be subject to the comprehensive accountability model.

Appendix A

Program Notes: Explanations, Adjustments, and Options

The vast majority of public schools in North Carolina fit the requirements for participation in the ABCs of Public Education accountability model without any modification. This section describes the types of schools that require an adjustment or schools that require an adjustment but have an option as to how the adjustment is implemented. How the adjustment for each type of school is made for participation in the ABCs of Public Education is described. The note number corresponds to the parenthetical number associated with these schools in the report.

Note	Explanation
1	K-2 Feeder Schools. The annual performance goals for each school are based on student pre-test scores and post-test scores for reading and mathematics (grades 3-8), and writing (grades 4 and 7 only). Since schools that serve only students in kindergarten, first grade, or second grade do not have student scores on which to base their performance, K-2 school performance is based on the performance of receiving schools with a third grade to which the K-2 school sends its students. For a K-2 school to be eligible for incentive awards, more than half of the students in the school must feed into a single school that receives an incentive award. The K-2 schools meet expected growth or exemplary growth if their receiving school meets expected or exemplary growth; otherwise, they are assigned Adequate Performance status. K-2 schools cannot be in the Top 25/10, Schools of Excellence, or Schools of Distinction in 1997-98. These K-2 schools are denoted with a (1).
	Junior High, Union Schools, and other schools. These schools have grades in both the K-8 and 9-12 grade ranges. For the 1997-98 year only, they could choose to be evaluated by either of the two models described below.
2	Comprehensive Model: These schools chose to have K-8 grades combined with high school grades for a <i>comprehensive</i> evaluation. These schools appear in Part I and Part II of the report, and are denoted by a (2).
3	Separate Model: These schools chose to have K-8 grades evaluated <i>separately</i> from high school grades. For these schools, the results of the K-8 evaluation appear in Part I; and the results of the high school evaluation appear in Part II of the report. Such schools are denoted by a (3).
4	Alternative/Special Schools. Alternative and special schools participate in the ABCs of Public Education like all other schools if they have sufficient data. Alternative and special schools, however, serve a wide variety of student populations and the duration of services may range from a few days to several years. An alternative or special school may not have sufficient data for participation in the ABCs of Public Education because a) there are too few students to provide reliable results (i.e., less than 15 students in the K-8 growth composite, or less than 30 students in any end-of-course test); or b) students are in membership less than the required 106 of 180 days for the K-8 model. In these cases, performance of alternative and special schools with insufficient

data is based on the performance of the schools served by that school. Testing requirements, such as the 98% (K-8) or 95% (High Schools) rule and Excessive Exemption rules do not apply to alternative schools for this accountability year only, irrespective of data. Alternative schools cannot be in the Top 25/10, Schools of Excellence, or Schools of Distinction in 1997-98.

Alternative and special schools without sufficient data receive the higher status (expected or exemplary) attained by any of the schools they serve. Incentive awards for such schools are computed as a percentage of the schools they serve. If none of the schools served by the alternative/special school receives an incentive award, the alternative/special school's status is Adequate Performance and it receives no incentive award. For 1997-98, the State Board of Education requires that no alternative/special school be identified as low-performing. Alternative/special schools with insufficient data are denoted with a (4) and appear in Appendix C.

5 **Confidence Band.** A confidence band was applied to the performance composite for schools that do not meet expected growth/gain and have a performance composite less than 50%. In 1996-97 such schools were designated Low-Performing. In 1997-98, such schools are low-performing only if the performance composite is significantly less than 50%. When the performance composite is not significantly less than 50% the performance composite is reported as 50 and the school is given the status Adequate Performance. These schools are identified with a (5) in the report.

Senior High Schools. Senior high schools are high schools with only grades 10-12. They have the following two options for participation in the ABCs of Public Education.

6 **Grades 10-12 Model:** These senior high schools chose to be evaluated using only the data from students in grades 10-12. Under this option, a) English I and Economic, Legal, and Political Systems (ELPS) are *not included unless* more than 10% of students in the tenth grade take English I or ELPS respectively; and b) Algebra I scores of tenth graders who took the course while in grades 7, 8, or 9 are *included* when computing the performance composite. These schools are denoted with a (6).

7 **Grades 9-12 Model:** These senior high schools chose to be evaluated by combining their data with data from the ninth grades of their feeder junior high schools. Under this option, a) all courses and components are part of the model; b) Algebra I scores of ninth graders who took the course while in grades 7 or 8 are *included* when computing the performance composite; and c) incentive awards (if any) are prorated at the junior highs or senior highs to reflect the special arrangement of combining the ninth grade with grades 10-12. In the report these schools are denoted with a (7).

8 **High Schools In Their Second Year of Operation.** The high school model for the ABCs of Public Education requires three years of data—two years to determine the baseline plus the current year's data. High schools that have only been operating for two years participate in the ABCs of Public Education with only one year of baseline data. These schools are denoted with an (8).

9 **High Schools Where a Mandated End-of-Course Test Has Been Moved to a Different Grade Level.** High schools were given the opportunity to request an adjustment to the high school accountability model if a mandated end-of-course test was moved from one grade level to another in the past two years. This adjustment was made available because the EOC gain composite requires two years of data for the baseline plus the current year's data. If moving the end-of-course test to a different grade level created non-comparable groups, then this end-of-course test was *not* included in the gain composite or in the performance composite. These schools in the report are denoted with a (9).

10 **High Schools with Insufficient Data.** A high school with less than 30 students tested in an end-of-course subject in *any* of the three years required for the high school accountability model has insufficient data for that subject. High schools (not alternative schools) with insufficient data will receive expected or exemplary status and incentive awards if merited on the basis of the data they do have, but they will not receive any recognition status (i.e., School of Excellence, School of Distinction, Top 10). If a school has insufficient data for an end-of-course subject and has not received an incentive award under the above provision, then the subject is *not* included in the calculation of the gain composite or performance composite, and ABCs status is based on the subjects for which there are sufficient data. Schools for which a subject was not included in the gain composite or performance composite calculation because of insufficient data are denoted in the report with a (10). High schools that have insufficient data for all six end-of-course subjects (and did not attain "Expected" or "Exemplary" on the basis of the data they have) will *not* be included in the ABCs, but will appear in Appendix C.

Appendix B

Technical Notes

This appendix describes how certain statistical and technical computations were implemented. Also, tables listing the parameters and constants used in the K-8 and high school models are provided.

Grade 3 Growth Parameters. The growth parameters at grade three were adjusted to reflect more appropriate data that was available after the 1996-97 implementation of the ABCs. The 1996-97 implementation of the ABCs relied on data for *unmatched* groups of third graders to set the growth expectations. The 1996-97 implementation of the ABCs was the first year for which matched grade 3 pretest and grade 3 (end-of-grade) posttest data were available. Matched student data provide a more appropriate estimate of the third grade growth parameters than unmatched data; therefore, the parameters for the third grade growth model were recalculated using the matched data from 1996-97. However, for 1997-98 only, the State Board of Education decided to use both sets of third grade growth parameters and apply the set that gives the best outcome for each school. Therefore for this report, the growth was computed using both the "unmatched" or "old," and "matched" or "new" parameters, and whichever computation yielded the greater growth for each school was used. See Table 1 for a list of the parameters and other constants used in the ABCs K-8 Growth Model. For 1998-99 and subsequent years, *only* the "new" parameters will be used.

Grade 7 Writing Standard Deviation. Writing scores are included in the growth composite using an index that compares performance over a three year period. This year, 1997-98, was the first year in which three years of grade 7 writing scores were available. Therefore, this was the first year that grade 7 writing scores could be included in the growth composite. This was also the first year in which the standard deviation of change could be calculated for grade 7 writing. See Table 1 for the grade 7 writing standard deviation of change used in the ABCs K-8 Growth Model.

Algebra I Scores in the Performance Composite. The high school performance composite is the percent of students at or above Level III in Algebra I; Biology; Economic, Legal, and Political Systems; English I; English II; and U.S. History. To make the performance composite representative of the students in each high school, the Algebra I scores for current ninth graders who took Algebra I prior to their ninth grade year are included in the performance composite. Algebra I scores of students at the middle school (grades 6, 7, or 8) during the current school year are *not* included in the K-8 performance composite or in the high school performance composite in 1997-98. The Algebra I scores of students at the middle school will be computed as part of the growth and performance composites in 1998-99 and subsequent years.

Performance Composite Confidence Band. To be identified as a low-performing school, the school must a) fail to make the expected growth/gain composite and b) have a performance composite less than 50% (i.e., a majority of students performing below Level III). The performance composite is the percent of students at or above Level III.

The confidence band, also known as a confidence interval, is a way of taking into account the statistical fluctuations that occur from year to year in small schools or schools with highly variable populations. The confidence interval itself will be narrow or

wide depending on the size of the school and the variation in the scores that make up the performance composite. In general, the confidence band is narrower when the number of students is larger, or the scores are more homogeneous; conversely, the confidence band is wider when the number of students is smaller, or the scores are less homogeneous.

What all this means for the performance composite is that it is possible that a potentially low-performing school has a performance composite that is considerably below 50% but that school is not considered low-performing because the confidence interval for that school is wide (i.e., there is less confidence in the value of the performance composite). This situation would likely be true for a school that has few students or has wide variation in test scores. Conversely, it is possible that a school has a performance composite that is fairly close to 50% and is considered low-performing because the confidence interval for that school is very narrow (i.e., there is high confidence in the performance composite). This situation would likely be true for a school that has a large number of students or students all have about the same test score.

As long as the value, 50, lies within or on the boundary of the confidence interval for an observed performance composite, then the performance composite is not significantly less than 50 and hence the school is not classified as low-performing.

Excessive Exemptions. Schools that were identified as having excessive exemptions were notified and asked to justify their exemption rate. These justifications were reviewed by the state agency staff and schools that were determined to be in violation are noted in this report. Exemption of students must be consistent with federal and state guidelines for students with disabilities and students appropriately identified as Limited English Proficient. Exemptions were determined at the school on a case by case basis and they must be documented in Individualized Education Programs (IEPs).

Table 1. Parameters and Other Constants Used in the ABCs K-8 Growth Model

		Grade	<i>b</i> ₀	<i>b</i> ₁	<i>b</i> ₂	Centering Mean	SD of change for composite component

Glossary

Achievement Levels

Student scores on the North Carolina end-of-grade (EOG) and end-of-course (EOC) tests fall within four ranges of scores described as follows.

For K-8 schools (EOG):

- Level I** Students performing at this level do not have sufficient mastery of knowledge and skills in this subject area to be successful at the next grade level.
- Level II** Students performing at this level demonstrate inconsistent mastery of knowledge and skills in this subject and are minimally prepared to be successful at the next grade level.
- Level III** Students performing at this level consistently demonstrate mastery of grade level subject matter and skills and are well prepared for the next grade level.
- Level IV** Students performing at this level consistently perform in a superior manner clearly beyond that required to be proficient at grade level work.

For high schools (EOC):

- Level I** Students performing at this level do not have sufficient mastery of knowledge and skills of the course to be successful at a more advanced level in the content area.
- Level II** Students performing at this level demonstrate inconsistent mastery of knowledge and skills of the course and are minimally prepared to be successful at a more advanced level in the content area.
- Level III** Students performing at this level consistently demonstrate mastery of the course subject matter and skills and are well prepared for a more advanced level in the content area.
- Level IV** Students performing at this level consistently perform in a superior manner clearly beyond that required to be proficient in the course subject matter and skills and are

very well prepared for a more advanced level in the content area.

These standards were set by the contrasting groups method of standard setting. Teachers (expert judges) were asked to categorize each of their students on the basis of "absolute achievement" (comparison to an external standard). Each student was categorized into one of four levels based on the teacher's experiences with the student throughout the school year. The percentages of students in each achievement level were remarkably similar across subjects and grades. Percentages of students were used in conjunction with the frequency distributions of scores from the administrations of the end-of-grade and end-of-course tests to determine where the cut points should be for the achievement levels.

At or Above Grade Level

Achievement Level III was established as "At Grade Level" by the State Board of Education. Student end-of-grade test scores must fall within this range for the student to be considered "at grade level." Achievement Level IV is considered to be "above grade level" performance.

EOC Index

The index is a weighted average of percentages of students in the four achievement levels on the end-of-course (EOC) tests. A weight of "3" is assigned to Level IV, "2" to Level III, "1" to Level II, and "0" to Level I. Weights for each level are multiplied by the percentage of students in that level and the results are summed. The sum is divided by 3 to obtain the index score. The index, then, summarizes the distribution of students across achievement levels. The index will change as the students move from one level to another. The higher the index score, the greater the percentage of students who are in the upper achievement levels. The index ranges from 0 to 100; 0 indicates that all students are in Level I, and 100 that all students are in Level IV.

Exemplary Gain Composite

A number that represents whether exemplary gain has been made across the six EOC courses plus the expected gain in College Prep/College Tech Prep component. The exemplary gain standard is the baseline index plus 5% of the difference between the baseline and 100.

Exemplary Growth Composite

This number is the sum of the standard exemplary growth components in reading, mathematics, and writing in K-8 schools. The exemplary standard factors in 10 percent above the statewide average growth in the formula used to set expected growth. Consequently, the exemplary growth standard is approximately 10% greater than the expected growth standard.

Expected Gain Composite

A number that represents the overall gain in the six courses and the College Prep/College Tech Prep component in the high school ABCs model. The differences between the current end-of-course (EOC) index and a baseline index (average of the two previous years' indexes) in the courses of Algebra I, Biology, ELPS, English I, English II (writing), and U.S. History are summed. To this is added the increase (over the previous year) in the percentage of graduates (earning diplomas) who completed either the College Prep or College Tech Prep courses of study.

Expected Growth Composite

A number which represents the growth in reading, math, and writing (grades 4 and 7) across all grades in a K-8 school. The expected growth for reading or mathematics at each grade level is subtracted from the actual growth in reading or mathematics at each grade level; each difference is then divided by the standard deviation of the difference for expected growth at each grade level. The quotient is the standard expected growth component for a given subject at a given grade level. The "standard expected growth" components in reading, math, and writing (grades 4 and 7) are summed across grade levels to get the expected growth composite.

Mean/Average

The mean or average is obtained by summing all scores and dividing by the total number of scores.

Performance Composite

One of three composite scores used to determine ABCs status. This score summarizes the performance of students in a K-8 school in reading, writing, and mathematics and in a high school in Algebra I (7th and 8th grade Algebra I scores for students who are now in ninth grade are computed with that high school's performance composite for 1997-98), Biology, ELPS, English I, English II, and US History. The performance composite is obtained by summing the numbers of students at or above Level III in each content area across grades 3 - 8 for the elementary/middle model, or summing the numbers of students at or above Level III on each of the six EOC tests for the high school model. This sum is then divided by the numbers of students with valid scores in each content area in each grade (elementary/middle) or on each of the six EOC tests (high school). The number is multiplied by 100 to convert it to a percentage.
